INNOVATION AND RELIABILITY IN EVERY SENSE

AK AK Ramon

Our production and offerings cover three ranges of machines: meat processing, vacuum packaging, and thermo-sealing. A single provider covers all your needs.

We have built our reputation by innovating, developing, and delivering robust, high-quality products and solutions to the food industry. Our equipment can be found in everything from small workshops, restaurants, and retail stores to supermarket chains. Reliability with maximum productivity.

BEING SUSTAINABLE MEANS NOT WASTING

We are versatile. We work to ensure that everyone has equipment tailored to their needs. We are convinced that food handling must be done responsibly.

We design and manufacture equipment for food processing and preservation, with a commitment to respecting food quality and maximizing its value. Since our beginnings, we have been a people-focused brand, caring about food management and utilization, as well as the people working in the food industry. We provide equipment that is designed and built to meet these goals. We operate with agility and adapt to the needs of our clients and distributors.

FOOD PROCESSING LINE

The most advanced
professional line for
food processing.

HYDRAULIC PISTON FILLERS

Designed for small
and medium productions

Technical information

- Totally manufactured in AISI 304 stainless steel.
- Independent oil tank in AISI 304 stainless steel.
- Equipped with pressure gauge.
- Equipped with speed regulator.
- Automatic decompression of the piston to prevent the mass comes out.
- AISI 304 stainless steel nozzles Ø 12, 20 & 30mm. (other Ø on request).
- Bank and cylinder completely sealed together.
- Knee lever to raise and lower the piston.
- Equipped with 2 wheels for easy displacement.

SC - 13 STAR. Capacity 13 liters.

SC - 20 STAR. Capacity 20 liters.

Hydraulic piston fillers

Totally
manufactured
in STAINLESS
STEEL

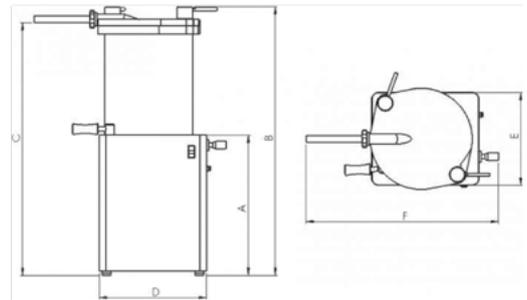

SC - 25 STAR. Capacity 25 liters.
SC - 30 STAR. Capacity 30 liters.

SC - 40 STAR. Capacity 40 liters.
SC - 50 STAR. Capacity 50 liters.

Machine dimensions (mm)

Model	A	B	C	D	E	F
SC-13 STAR	650	1.195	1.110	435	330	765
SC-20 STAR	650	1.195	1.114	435	360	790

Accessories for hydraulic piston fillers

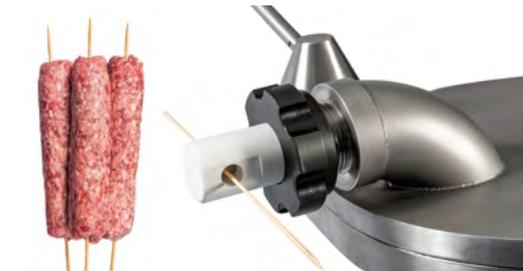

VOLUMETRIC PORTIONER

ACCESSORY FOR MEATBALL PRODUCTION

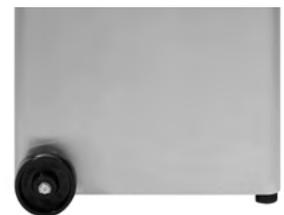

ACCESSORY FOR CROQUETTE PRODUCTION

ACCESSORY FOR HAMBURGER PRODUCTION

ACCESSORY FOR KEFTA

WHEEL SUPPORT

BURGER MACHINE

Designed for small and medium productions

Technical information

- Capacity: 24 liters.
- Variable burger thickness.
- Diameter variable from 130mm to 25mm.
- Approximately production: 1.800 hamburgers/hour or 3.600 meatballs/hour.
- Equipped with speed control.
- Safety micro switch on the lid and on the dispenser plate.
- Motor: 220V/1ph/50Hz.
- Low voltage movement (24V).

Shapes	Standard measures
Circle hamburgers	40 / 65 / 90 / 100 / 115 / 130 mm
Oval hamburgers	110x80 mm
Meatballs	22 / 32 mm

MIXERS

Designed for small and medium productions

Technical information

- Totally manufactured in AISI 304 stainless steel.
- Powerful and silent gear motor group.
- Protection lid manufactured in transparent plastic suitable for food.
- Removable bowl for AMM-35 S.
- Tilting bowl for AMM-55 S / AMM-55 TWO / AMM-80 S / AMM-80 TWO.
- Head opening with automatic stop of the paddles.
- Equipped with handle and wheels for easy displacement.
- Automatic help to raise and lower the head. (Except for AMM-35 S)
- Very easy cleaning.
- Electrical box water resistant.
- Start/stop button water resistant.
- Voltage: 400-230V/3ph/50Hz.

HORIZONTAL MIXER SERIE "H"

Designed for medium productions

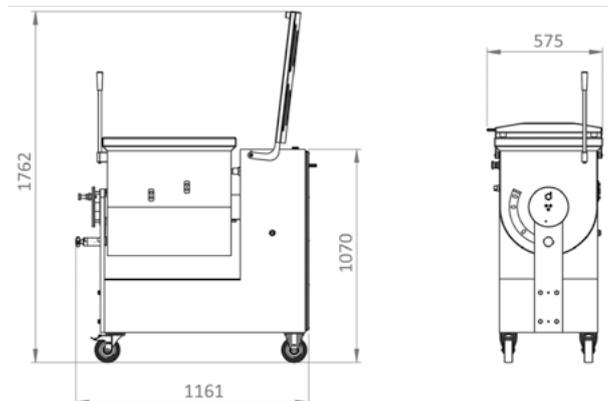

Technical information

- Totally manufactured in AISI 304 stainless steel.
- 150 L Capacity.
- T form of the arm easily removable for cleaning.
- High resistance and silent Gearbox mechanism.
- Equipped with wheels for easy movement.
- Download button.
- Double direction of rotation.
- Maintenance free.

AMM-150H. Capacity 150 liters.

Totally manufactured in STAINLESS STEEL

AMM-150 H	
Bowl capacity in Liters	150
Bowl capacity in Kg	± 110
Three-phase motor power HP/Kw	2/1.5
Packaging dimensions (mm)	1200x830x1220
Net/gross weight (Kg)	175/205

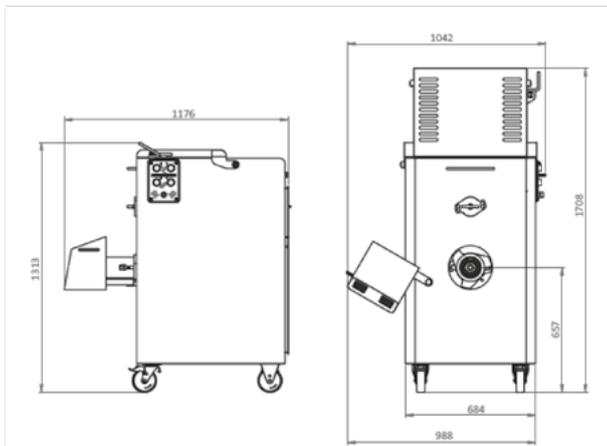

MINCER MIXER

Designed for medium productions

Technical information

- Totally manufactured in AISI 304 stainless steel.
- Equipped with two independent motors.
- Top security cover codificated.
- Security cover exit throat.
- Top security cover cushioning.
- Easy removal of the paddles.

	PM-32 / PM-114
Bowl capacity in Liters	100
Three-phase motor power HP/Kw Mixer	1.5/1.1

Net/gross weight (Kg)	255/275

PM-32 / PM-114. Capacity 100 liters.

MINCERS

Designed with high power that allows to chop any type of meat

Technical information

- Body manufactured totally in AISI 304 stainless steel.
- Compact design and robust.
- Throat removable.
- Hand protection in the tray according to CE.
- High resistance motor.
- Steel reducer in oil bath.
- Motor thermal protector.
- Push hammer.
- Plates and knives included.

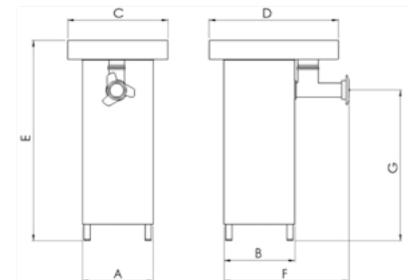

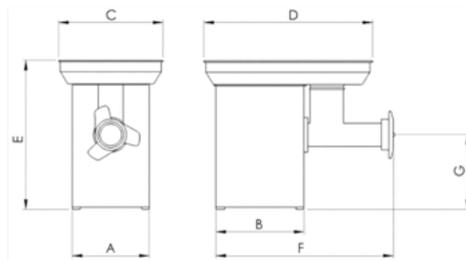

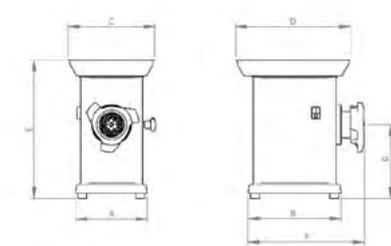

P-22. Production ± 300 kg/h. Motor Power 1.5HP.
P-32. Production ± 425 kg/h. Motor Power 2.5HP.

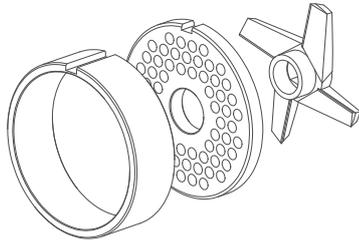

SUPERSTAR. Production ± 800 kg/h.
Motor Power 3.5HP.

TOP-114. Production ± 1.000 kg/h.
Motor Power 5.5HP.

BOWL CUTTERS

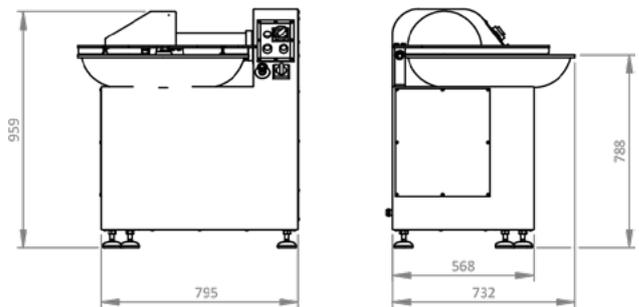

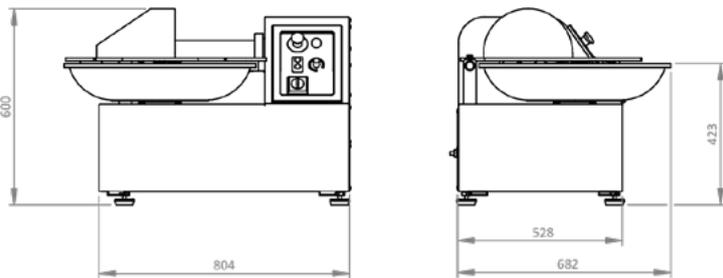

Designed for small workplaces and pilot plants

A-20 VAR

- Totally manufactured in AISI 304 stainless steel.
- Highly robust AISI 304 stainless steel cast bowl.
- Equipped with variable speed.
- Thermic protection of the motor.
- Can cut frozen meat.
- Electronic brake of the knives.
- Removable knife head.
- Equipped with 3 knives (optional 6 knives).
- Machine totally closed.

AS-30

- Totally manufactured in AISI 304 stainless steel.
- Highly robust AISI 304 stainless steel cast bowl.
- Equipped with 1 motor.
- Thermic protection of the motor.
- Can cut frozen meat.
- Electronic brake of the knives.
- Removable knife head.
- Equipped with 3 knives (optional 6 knives).

VAC LINE

Professional, modern,
and reliable vacuum
packers machines.

VACUUM PACKERS TABLE TOP

Professional, modern,
and reliable vacuum sealers

AK

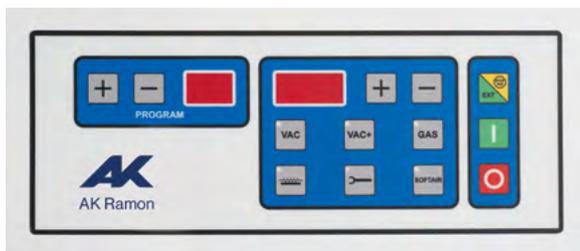

Vacuum controlled by time without gas

- Digital control panel.
- Vacuum control by time.
- Sealing time regulation.
- Progressive atmosphere inlet (Soft-Air).
- VAC-STOP push button, finish the vacuum & continue the process.
- Monitoring step by step of the cycle through LEDs.
- Vacuum gauge.

Vacuum & Gas controlled

- Digital control panel.
- Vacuum control by time.
- Gas flushing entrance control by time.
- Sealing time regulation.
- Progressive atmosphere inlet (Soft-Air).
- VAC-STOP push button, finish the vacuum & continue the process.
- Monitoring step by step the cycle through LEDs.
- Vacuum gauge.

Vacuum controlled by sensor

- Digital control panel.
- Vacuum control by sensor.
- Gas flushing entrance control by sensor.
- Sealing time regulation.
- Progressive atmosphere inlet (Soft-Air).
- VAC-STOP push button, finish the vacuum & continue the process.
- VAC+ push button, additional vacuum time
- Maintenance push button control.
- 99 memory positions.
- Monitoring step by step of the cycle through LEDs.

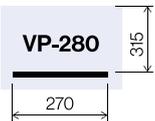

VACUUM PACKERS TABLE TOP

Technical information

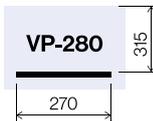

- Manufactured in AISI 304 stainless steel.
- Transparent lid.
- Simple sealing VP-280 / VP-370.
- Double sealing VP-430.10 / VP-430.20.
- Progressive atmosphere entry (except VP-280).
- Machine cycle: 10–30 sec.
- Equipped with thick polyethylene for quicker packaging and easier bag placement. (except VP-280).
- Easy maintenance and cleaning
- Voltage: 220V / 1ph / 50Hz.

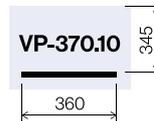

VP-280. Flat Lid.
BECKER pump 8 m³/h.

VP-280. High Lid.
BECKER pump 8 m³/h.

Technical information

Soft Air

All models include the progressive atmosphere (Soft air). Using this option, the air enters into the vacuum chamber gradually and controlled based on a predetermined time, so the bag can adapt to the product carefully without damaging it. It is ideal for meat with bones, lobsters, screws, powders, electronic components, or other kinds of products that need more caution to be packed.

Types of sealing bars

Simple sealing

Double sealing

Simple sealing + cut

SEALING LINE

Thermo-sealing machines
for multiple applications

MANUAL TRAY SEALING MACHINES

Ideal for small business

Technical information

- Manufactured in AISI 304 stainless steel.
- Die set in anodized aluminum.
- Manual tray sealing machine.
- Ergonomic and robust model.
- Perfect for transporting the food without loss of liquid or sauces.
- Hot plate ideal for any type of die set.
- Easy change of die set, which are interchangeable in few seconds.
- Fast heating of the selected temperature.
- It allows to work with different kind of of tray materials, PP, PET, ALUMINIUM...
- Sealing and cutting of the film simultaneous.
- Easy maintenance and cleaning.
- Voltage: 220V/1ph/50Hz.

TS-150
 Include die set 137x192 mm.
 Maximum sealing surface: 210x155 mm.
 Power: 900W

TS-160
 Include die set 260x160 mm. (1/4 GN)
 Maximum sealing surface: 270x190 mm.
 Power: 900W

TS-170 & TS-170 CUT
 Include die set 320x260 mm. (1/2 GN)
 Maximum sealing surface: 320x260 mm.
 Power: 1500W

Standard die set

TS-150
 192 x 137 mm (1 tray)
 137 x 96 mm (2 trays)

TS-160
 260 x 160 mm (1 tray) – 1/4GN
 192 x 137 mm (1 tray)
 168 x 130 mm (2 trays) – 1/8GN

TS-170
 320 x 260 mm (1 tray) – 1/2GN
 260 x 160 mm (2 trays) – 1/4GN

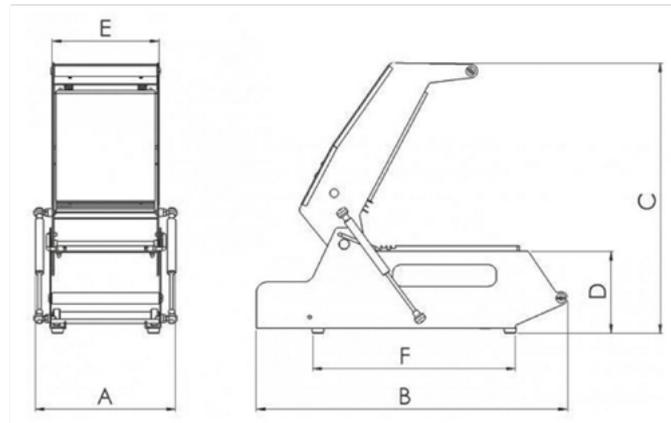

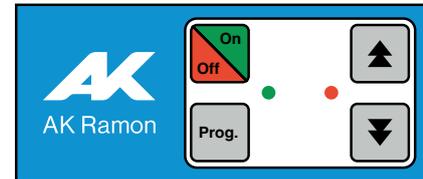

TS-170 CUT
 320 x 260 mm (1 tray) – 1/2GN
 260 x 160 mm (2 trays) – 1/4GN
 PROFILE CUT

WE MANUFACTURE ANY TYPE AND SHAPE OF MOLD TO MATCH THE CLIENT'S TRAYS

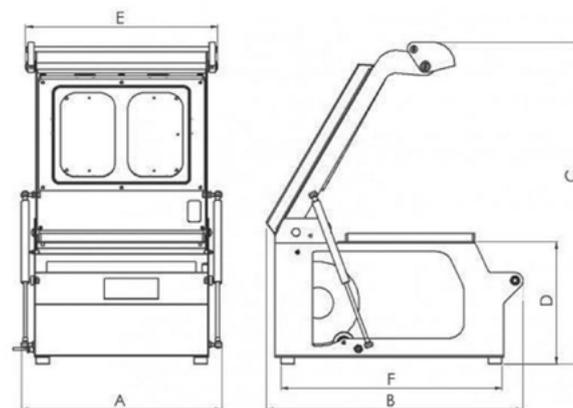

MANUAL TRAY SEALING MACHINES

Digital control panel

- Digital panel control.
- Temperature regulation.
- Automatic stop programming.
- Electronic control of the temperature 0°C to 230°C.

TS-170 CUT WITH PERIMETRAL CUTTING

SEMI-AUTOMATIC TRAY SEALER

Give prestige to your business

Technical information

- Manufactured in AISI 304 stainless steel.
- Die set in anodized aluminum.
- Semi-automatic tray sealing machine.
- Automatic film advance.
- Ergonomic and robust model.
- Perfect for transporting the food without loss of liquid or sauces.
- Easy change of die set.
- Fast heating of the selected temperature.
- It allows to work with different types of tray materials, PP, PET, ALUMINIUM...
- Easy maintenance and cleaning.
- Voltage: 220V/1ph/50Hz.

TS-200 & TS-200 GF
Maximum sealing surface: 280x192 mm
Power: 900W

TS-300 & TS-300 GF
Maximum sealing surface: 320x260 mm
Power: 1500 W
Required compressed air.

GF Models
equipped to work
with gas flushing

Standard die set

TS-200 & TS-200 GF
260x160 mm (1 tray) – 1/4GN
168x130 mm (2 trays) – 1/8GN
CUT BY THE BACK PART

TS-300 & TS-300 GF
320x260 mm (1 tray) – 1/2GN
260x160 mm (2 trays) – 1/4GN
168x130 mm (4 trays) – 1/8 GN
PROFILE CUT

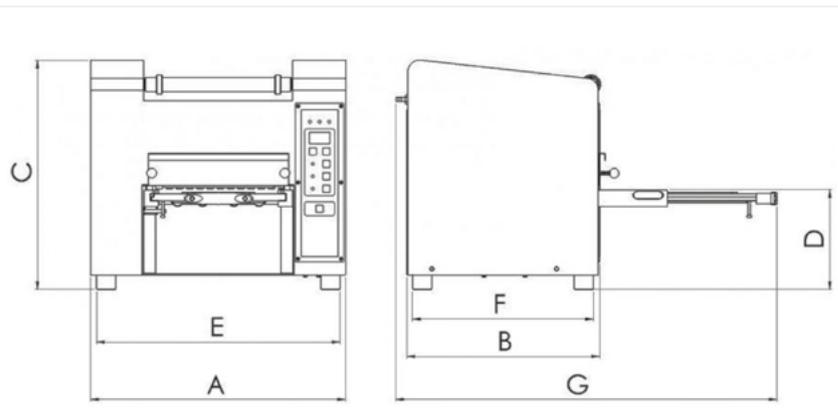

WE MANUFACTURE ANY TYPE AND SHAPE OF MOLD ACCORDING TO THE CLIENT'S TRAYS

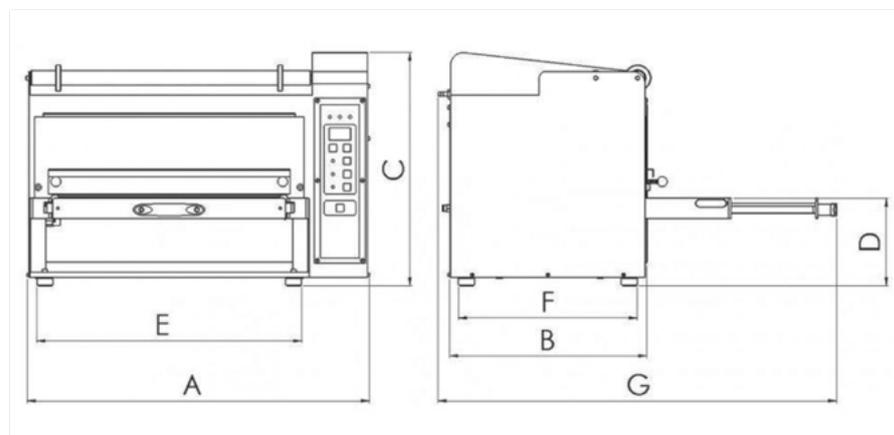

SEMI-AUTOMATIC TRAY SEALER

Digital control panel

- Digital control panel.
- Temperature regulation.
- Sealing time regulation.
- Gas entry time regulation, only in GF models.
- Electronic control of the temperature 0°C a 230°C.

Model	Machine dimension (mm)							Packaging dimensions (mm)	Net/gross weight (Kg)	Film roll width (mm)

AUTOMATIC TRAY SEALER WITH VACUUM AND GAS

For perfect and longer preservation

Technical information

- Manufactured in AISI 304 stainless steel.
- Die set in anodized aluminum.
- Automatic tray sealing machine.
- Ergonomic and robust model.
- Perfect for transporting the food without loss of liquid or sauces.
- Easy change of die set, which are interchangeable in few seconds.
- Fast heating of the selected temperature.
- It allows to work with different types of tray materials, PP, PET, ALUMINIUM.
- BUSCH pump 20m³/h.
- Easy maintenance and cleaning.
- Voltage: 400V/3ph/50Hz.

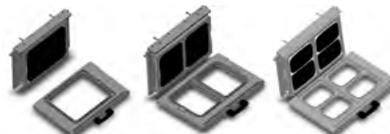

Optional

- BUSCH pump 40 m³/h.
- BUSCH pump 20 m³/h for oxygen levels above 21%.
- Silent compressor.

TS-550
maximun sealing surface: 320x260 mm
Power: 1.500 W
Requires compressed air.

Standard die set

With profile cut of the film

320x260 mm (1 tray) – 1/2GN
260x160 mm (2 trays) – 1/4GN
168X130 mm (4 trays) – 1/8GN
PROFILE CUT

Without profile cut

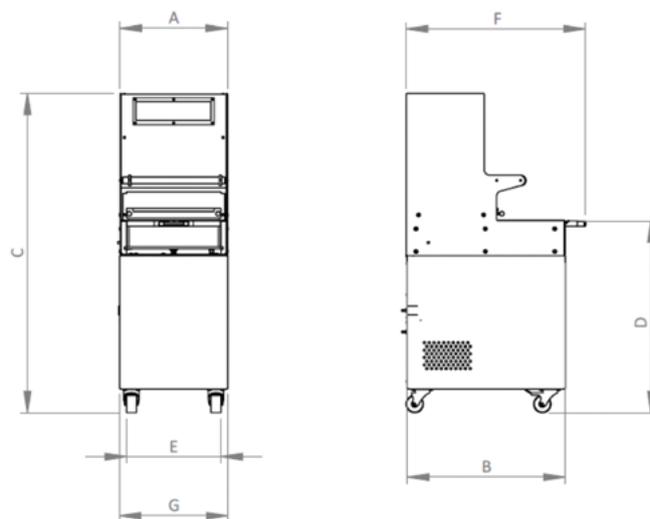

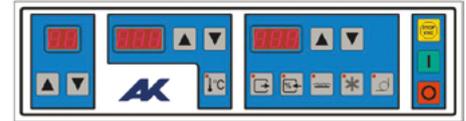

320x260 mm (1 tray) – 1/2GN
260x160 mm (2 trays) – 1/4GN
168X130 mm (4 trays) – 1/8GN
CUT BY THE BACK PART

WE MANUFACTURE ANY TYPE AND SHAPE OF MOLD TO MATCH THE CLIENT'S TRAYS

AUTOMATIC TRAY SEALER WITH VACUUM AND GAS

Digital control panel by sensor

- Digital control panel.
- Vacuum control by sensor.
- Gas flushing entrance control by sensor.
- Sealing time regulation.
- VAC-STOP push button, finish the vacuum & continue the process.
- Maintenance push button control.
- 99 memory positions.
- Monitoring step by step of the cycle through LED.
